

# Super-Duty STOL CH 801-SD

## Interest Form

To keep production costs down, the manufacturing of airframe kits for the Zenair STOL CH 801-SD is currently limited to production-runs of five complete airframe kits at a time. With this new policy in place, [posted prices](#) for CH 801 kits can remain in effect.

Zenair continues to gather names of potential CH 801-SD builders/owners in an on-going way; these individuals will be contacted when it looks like there are sufficient numbers for a production-run. No delivery schedule has been set; the delivery of the kits will depend entirely the number of committed orders received and on when they are received.

To have your name added to the list of interested/potential CH 801-SD builders/owners, please complete and return a copy of this page to Zenair (by e-mail or by fax).

Thank you for your interest in the remarkable 4-seat Super-Duty STOL CH 801-SD!
